J.K. Fenner (India) Limited

Yamada Manufacturing Co., Ltd.

Announce Strategic Relationship with Yamada Manufacturing Co., Ltd.

J.K. Fenner (India) Limited, a leading manufacturer of automotive and industrial engineering solutions, today announced a strategic relationship with Yamada Manufacturing Co., Ltd., Japan, to strengthen the development and manufacturing of advanced automotive components for domestic and global markets.

Established in 1946, Yamada Manufacturing Co., Ltd., Japan, is a leading Japanese automotive component manufacturer with expertise in oil pumps, water pumps, steering columns, drivetrain components, and other precision automotive systems. The company serves leading global OEMs, bringing decades of engineering excellence and manufacturing expertise.

The strategic relationship combines JK Fenner's strong manufacturing capabilities, engineering expertise, and customer reach with Yamada Manufacturing's advanced Japanese technology and product development capabilities. The partnership aims to accelerate innovation, enhance product quality, and address the evolving requirements of automotive OEMs, including next-generation mobility solutions.

Through this strategic relationship, the two companies will focus on:

- Technology transfer for advanced automotive component manufacturing.
- Joint product development to meet global quality and performance standards.
- Localization of advanced technology products for the Indian automotive market.
- Enhancing manufacturing processes, quality systems, and engineering capabilities.
- Delivering innovative, reliable, and cost-effective mobility solutions to customers.

Through this strategic relationship, Yamada aims to accelerate its market entry and business expansion in India.

■ About Yamada Manufacturing Co., Ltd.

Yamada Manufacturing Co.,Ltd. is specialized in development, design and manufacturing auto parts for the critical function of “driving, steering and braking” including transmission components, steering system components and variety pumps, particularly oil and water pumps for automobiles and motorcycles. Yamada operates in Japan, United States, China and Thailand. Yamada’s philosophy is working together as a technology oriented corporation to provide value beyond customers' expectations in a creative and original way, and to spread joy to people all over the world.
